TL;DR

Select a cookware tripod by exact configuration, assembled dimensions and pack scope. Review the proposed cookware connection separately from the stand's size. Seawing lists two SKU 30 configurations and specifies a tripod-only offer with the pot and stove excluded. Request a connection drawing, an itemized pack list and applicable load evidence for the proposed cookware before approving the pairing.

Start with the listed configuration

A product title can describe a tripod without identifying the connection hardware, the packed configuration or the cookware it is intended to carry. Start with the exact stand option, then write a separate row for the proposed cookware and its connection point. Use the quotation, drawing and sample revision to keep those two records aligned.

The structured Seawing record lists 6061 aluminium alloy and two SKU 30 options. It lists the 3-piece option at 52 cm wide × 80 cm high and 480 g, and the 4-piece option at 75 cm wide × 110 cm high and 540 g. The shared catalogue packed size is 7 × 3 × 40 cm. Use those values as catalogue data for comparison and request a drawing if your fit depends on exact dimension points.

For an example brief, select the 3-piece option and enter its listed width, height and weight. Record pot and stove as excluded, as stated in the catalogue. Ask for the drawing and itemized components for that option before choosing cookware or writing a shelf label. Keep any proposed hook, chain, bag or other accessory open until it appears on the exact offer.

3-piece catalogue option: 52 cm wide × 80 cm high, 480 g.

4-piece catalogue option: 75 cm wide × 110 cm high, 540 g.

Published pack scope: tripod only. Pot and stove excluded.

Compare size, connection and pack scope separately

The two option rows compare the published record. The remaining rows define the evidence needed to match cookware and confirm contents.

Compare size, connection and pack scope separately

Control	Catalogue starting point	Evidence to request	Decision
3-piece option	52 cm wide × 80 cm high, 480 g	Exact revision and dimension points	Shortlist for dimensional review
4-piece option	75 cm wide × 110 cm high, 540 g	Exact revision and dimension points	Compare on the same basis
Packed size	7 × 3 × 40 cm listed	Packed state and measurement method	Check the buyer’s pack constraints
Connection	Cookware proposed separately	Drawing with cookware interface and applicable load evidence	Review the exact pairing
Pack list	Tripod only, pot and stove excluded	Itemized offer for accessories	Price and label the agreed contents

Three checks before a pairing is approved

Stand configuration

Identify the exact option and its documented size.

Cookware interface

Record the connection geometry for the intended cookware.

Pack approval

Confirm the items in the offered pack and any supporting evidence.

Three checks before a pairing is approved

Read catalogue scenes as visual references

The catalogue scenes give context for the tripod category. For an order, request the exact version’s component list, drawing and applicable evidence.

A 3-piece request with traceable fields

Copy the published 3-piece record as the starting line. Attach the intended cookware reference as a separate buyer input and ask which data are available for the combination.

A 3-piece request with traceable fields

Line	Buyer record	Review point
Option	SKU 30, 3-piece	Same revision on the drawing and quote
Dimensions	52 cm wide × 80 cm high	Ask where each dimension is measured
Weight	480 g catalogue value	Ask what the measurement includes
Contents	Tripod only, pot and stove excluded	List any requested accessories separately
Cookware	Buyer supplies its model and interface	Review matching evidence for that pairing

Five steps to a usable tripod enquiry

1. Choose a catalogue option
2. Record assembled and packed dimensions
3. Identify the intended cookware connection
4. Reconcile the offer and pack list

5 Send the revision, quantity, market and questions

Five steps to a usable tripod enquiry

Keep each product’s figures with its own record

Petromax and Lodge publish their own tripod configuration and connection details. Those pages are useful examples of the fields a buyer can ask for. Compare the fields, then use only the exact offer and evidence for the selected SKU 30 configuration. The listed alloy and dimensions identify catalogue characteristics.

Destination and use conditions belong in the enquiry. Start with the relevant authority for site restrictions and destination documentation. The BLM and European Commission links illustrate distinct location and product documentation questions.

Frequently Asked Questions

What options are listed for SKU 30?

The record lists a 3-piece option at 52 cm wide × 80 cm high and a 4-piece option at 75 cm wide × 110 cm high.

Are the pot and stove included?

The catalogue specifies a tripod-only offer. The pot and stove are excluded.

Does the catalogue packed size describe a shipping carton?

The record lists a packed size of 7 × 3 × 40 cm. Request the carton dimensions and contents as separate fields.

How should I check cookware compatibility?

Supply the cookware model and connection details and request applicable pairing evidence for the selected tripod version.

Can I infer load from the alloy name?

Use 6061 aluminium alloy as the catalogue material description. Request applicable load evidence for the exact configuration.

What should I send with the request?

Send the selected option, quantities, destination, cookware details and the pack or connection questions to review.
