

Glamping Tent Site Brief: Footprint, Access and Layout

A project-buyer checklist for turning confirmed site facts into a tent enquiry without assuming fit or approval.

Cover: AI-generated editorial scene; it is not a Seawing product, person, factory, customer site, shipment, test or project approval.

TL;DR

Start a glamping tent site brief with the exact location, selected tent version if known, scaled site plan or photos, access route, surrounding structures, ground and drainage information, utilities, intended layout and local approval contacts. These inputs create questions for the supplier and competent local parties; they do not establish footprint, capacity, installation feasibility, safety, permissions, foundation needs, weather suitability or project approval.

Turn site facts into checkable questions

Turn site facts into checkable questions

Brief input	Provide	Confirm before a decision
Location and plan	Address or coordinates, boundaries, scaled plan, photos and known restrictions	Local authority, landowner and project-specific requirements.
Access and layout	Arrival route, unloading area, routes, adjacent uses and proposed tent positions	Actual clearances, circulation and delivery feasibility for the chosen version.
Ground and services	Known surface, slope, drainage, overhead/underground services and utilities	Site assessment, anchoring or foundation approach and any local requirements.
Tent request	Selected version, openings, proposed use and installation timeframe	Current drawings, dimensions, configuration and order-specific proposal.

From site information to a project enquiry

Locate the project

Locate the project

Share a scaled plan or clear photos, boundaries and the actual location.

Map access and constraints

Map access and constraints

Record arrival, unloading, routes, neighbouring uses and known restrictions as facts or open questions.

Describe ground and services

Describe ground and services

Share confirmed surface, slope, drainage and utility information; do not infer a build method.

Send the site and tent brief

Frequently Asked Questions

Can a tent photo establish the required footprint?

No. Use a scaled site plan and request current dimensions for the selected version.

Does an access path prove delivery or installation feasibility?

No. Record its actual conditions and ask the relevant supplier and local parties to review the project.

Can a generic layout secure permission?

No. Permissions and local requirements must be confirmed with the applicable authority and project parties.

What ground information should be in the brief?

Provide known surface, slope, drainage, services, restrictions and recent site photos; arrange assessment where information is missing.

Where should the project brief go?

Use the custom tents page and submit the location, selected version if known, site information and open questions.
