TL;DR

Keep the three Seawing SKU 52 starry-sky inflatable tent models on separate lines. The 6.3, 9 and 12 m² records differ in unfolded size, packed size, net weight and PVC air-beam diameter: 10 cm for 6.3 m² and 12 cm for the other two. A floor-area name is not a sleeping-capacity calculation or a substitute for a model-specific sample and packing list.

Start with the model identity

SKU 52 covers three starry-sky inflatable tent records: 6.3, 9 and 12 m². The area labels correspond to listed length × width, but they do not define usable sleeping floor or a guaranteed occupancy. Select one model before discussing transport, accessory count or quotation. The separate canopy-equipped SKU 53 is another product, not a fourth line in this matrix.

Seawing starry-sky inflatable tent · SKU 52

The 6.3 m² record lists 300 × 210 × 200 cm unfolded; 9 m² lists 360 × 250 × 230 cm; 12 m² lists 300 × 400 × 200 cm. Use the linked SKU 52 page to retain the exact product identity and select the size in your enquiry.

Product catalogue photograph · Identify the starry-sky product, then match its actual size label.

Compare the three complete model rows

The packed dimensions are 69.5 × 41.5 × 40.5 cm for 6.3 m^2, 75 × 50 × 45 cm for 9 m^2, and 82 × 49 × 44 cm for 12 m^2. Net and total-with-accessories weights are 15/16 kg, 24/28 kg and 22/28 kg respectively. The 12 m^2 net weight is lower than the 9 m^2 value in the supplied sheet; retain those separate recorded figures and verify the selected samples rather than smoothing the difference.

All three model rows list PVC air beams. The 6.3 m^2 row gives 10 cm diameter; the 9 and 12 m^2 rows give 12 cm. Diameter is not operating pressure. The fabric options are 210D, 300D or 420D Oxford with listed masses 120, 150 or 180 g/m^2, PU coating and PU3000 fabric specification, with PE or 300D Oxford floor options. Confirm the chosen option for each model; do not combine every option into one stock unit.

Use one row per starry-sky model

SKU 52 model	Unfolded / packed (cm)	Net / with accessories	PVC beam
6.3 m²	300 × 210 × 200 / 69.5 × 41.5 × 40.5	15 / 16 kg	10 cm
9 m²	360 × 250 × 230 / 75 × 50 × 45	24 / 28 kg	12 cm
12 m²	300 × 400 × 200 / 82 × 49 × 44	22 / 28 kg	12 cm

Keep three sample versions and their pump sets separately identified.

Identity

Name the 6.3, 9 or 12 m² SKU 52 version.

Configuration

Record selected outer fabric and floor option.

Handoff

Match the same sample, pump kit and carton to the quote.

Each quotation line should preserve one model and its selected configuration.

Check the packed unit and pump kit

Measure a complete packed sample on all three axes and photograph the label showing its area version. The published packed size is not automatically the shipping-carton size. Keep the net tent-body weight, total with accessories and export-carton weight in separate fields. GS1's package measurement framework explains why trade-item and package levels must be named clearly.

The current rows name a carry bag, guy lines, stakes and manual pump; electric pump is optional. They do not give exact counts, valve interface, inflation pressure or compatible electric-pump model. Request the itemized kit, hose/adapter photos and version-specific instructions. Another brand's valve guide illustrates the need to match parts, not the specifications of this tent.

Measure the actual packed sample along three axes before comparing freight space.

Separate the packed kit from the carton

Packing field	Current record	Request for selected model
Tent body	Net weight by model above	Confirm sample label and measured unit
Complete kit	Total weight with accessories by model above	Itemize bag, lines, stakes and manual pump
Electric pump	Optional	Name compatible pump and separate terms
Valve and pressure	Not established by the sheet	Obtain matched instructions and interface photos
Export carton	Not established by packed-size field	Confirm carton dimensions and gross weight

Lock the approved sample version

Give the sample, bag label, photos, fabric/floor selection, pump set and packing list the same revision identifier. Confirm any change before bulk production. If two sizes are ordered, keep separate sample records and carton lines. Do not let a 6.3 m^2 photo become evidence for the 9 or 12 m^2 packing contents.

For a comparable quotation, state the exact area version, selected Oxford weight and floor, quantity, destination, packaging, and any electric pump as a separate option. The current sheet lists khaki or army green and colour/logo/fabric choice from 50 units; ask for the selected option and written commercial terms. Use the current product page or quote for price rather than a fixed number in this guide.

Reconcile the manual pump, hose, stakes, lines and bag against the chosen sample list.

A quotation request that keeps versions apart

“Please quote Seawing SKU 52, 9 m^2 version, for our stated quantity and destination. The current sheet lists 360 × 250 × 230 cm unfolded, 75 × 50 × 45 cm packed, 24 kg net, 28 kg with accessories and 12 cm PVC air beams. We are considering the 300D Oxford and 300D Oxford floor options; please confirm this combination, provide the sample revision, itemized manual-pump kit and compatible valve instructions, and quote any electric pump separately. Confirm the export-carton dimensions and gross weight.” Replace the option and commercial inputs before sending.

Use the product views for identity, not packing proof

Catalogue photos identify the starry-sky product family. They do not prove which of the three area versions or kit counts a particular picture represents. The worktable scenes show how a buyer can compare versions and packing; they are not photographs of the SKU 52 shipment.

Product catalogue photograph · A second product view helps verify the form, but not a packed version.

From model choice to comparable quotation

1. **Select the model**
   Choose 6.3, 9 or 12 m² under SKU 52.

2. **Record options**
   State outer fabric weight, floor and colour version.

3. **Check the sample**
   Match dimensions, beam diameter, label and kit list.

4 Confirm packing

Separate net, complete kit and export-carton measurements.

5 Request the quote

Send the accepted revision, quantity, destination and optional pump choice.

From model choice to comparable quotation

Sources and further reading

These general tent, valve and package references inform the questions above. Their dimensions, valve details and performance do not apply to SKU 52. The Seawing product page and current specification provide the model values in the matrix.

Open the SKU 52 product record, choose one area version, and send the selected fabric/floor, sample, packing and destination details with your enquiry.

Frequently Asked Questions

Does 6.3, 9 or 12 m² specify sleeping capacity?

No. Those are the model area labels and listed length × width. Check the selected model's layout and intended sleeping arrangement separately.

Do all three models have 12 cm air beams?

No. The current sheet lists 10 cm PVC air beams for 6.3 m² and 12 cm for the 9 and 12 m² versions. These are diameters, not pressure settings.

Why is the 12 m² net weight lower than the 9 m² figure?

The current specification lists 22 kg net for 12 m² and 24 kg net for 9 m². Do not infer the reason; verify the chosen sample and written packing record.

Is an electric pump included?

No. The current rows list a manual pump and mark an electric pump optional. Request compatibility and separate written terms if required.

Is packed size the same as export-carton size?

Not necessarily. The recorded packed sizes describe the product reference; request actual carton dimensions and gross weight for the selected version and pack configuration.
