Outdoor Packs, Apparel & Footwear Wholesale

3L Waterproof Hiking Jacket | Custom Logo Seam-Sealed Outerwear

https://seawingglobaltrade.com/products/packs-apparel-footwear

TL;DR

Build a wearable outdoor range around the intended user and the task, then separate size, construction and finish. Backpack litres describe a capacity label, not torso fit or a carrying-load approval. Garment size labels need measurements of the finished garment; footwear needs its own size conversion and fitting reference. Keep these different sizing systems on separate sheets. For a sample, use the actual clothing layers or equipment the customer is expected to carry. Record the version tested and the observations so a later colour or construction change is not treated as the same approved item.

Keep the comparison traceable

Keep one specification sheet for each shortlisted version. Put the product URL, size, colour and dated photographs at the top, then distinguish published facts from requested changes. If the brief combines a tent, a cooking item and clothing, give each its own line and quantity. Their dimensions, materials and

accessories describe different things and should not be merged into a single specification. For example, a tent’s packed length is a storage measurement, a kettle’s external dimensions do not state its usable capacity, and backpack litres do not describe torso fit. When a field is absent, leave it marked for confirmation instead of borrowing a value from a visually similar item. Before comparing quotations, check that they refer to the same version and supply scope. Record any substitutions explicitly, including the affected component, colour or packaging. This makes later sample review more useful: the reviewer can compare an identified item against a written requirement instead of trying to reconstruct a decision from a photo and a price.

Compare catalog references

Use the individual specifications to build your shortlist. Each photograph below belongs to the named reference; other products are shown for comparison and are not included with this item.

Packable 20 L Daypack | 230 g Water-Resistant Travel Backpack

The 20 L daypack is listed at 230 g, with expanded dimensions of 46.5 × 26.5 × 9.5 cm and packed dimensions of 20 × 18 × 6 cm. Its fold-to-pocket format is a practical distinction from the other backpacks. The published litre capacity should stay as stated; multiplying the exterior dimensions of a flexible bag is not a substitute capacity measurement.

Capacity	20 L
Unit weight	230 g
Expanded size	46.5 × 26.5 × 9.5 cm
Packed dimensions	20 × 18 × 6 cm
Features	foldable, water-resistant and breathable fabric

3L Waterproof Hiking Jacket | Custom Logo Seam-Sealed Outerwear

Here 3L means three-layer construction, not a three-litre capacity. The jacket record describes a composite shell, sealed seams and specified front-zipper and pocket construction, with embroidery as a logo option. For a branded sample, mark the proposed embroidery location and retain the seam and closure details in the brief. The listing does not publish a numeric breathability or hydrostatic-head result.

Design	3-layer composite outerwear
Seams	fully seam-sealed
Closures	waterproof front zipper and waterproof pocket construction
Logo option	Embroidery
Intended use	group, hiking and outdoor apparel orders

Waterproof Tactical Hiking Boots | Suede Leather Trekking Shoes

The boots combine a suede cow-leather and fabric upper, a waterproof sock liner and a rubber-plus-PU outsole. These are separate parts of the footwear specification. Sand and khaki are the listed colour options. A fitting brief should identify the size scale and actual foot or last measurements; do not infer a protective-toe classification or occupational certification from the word tactical.

Upper	suede cow leather and fabric
Lining	waterproof sock liner
Outsole	rubber and PU composite
Colour	sand and khaki
Intended use	hiking, camping, trekking and outdoor work

From product selection to a sample brief

1. **Choose the exact reference**
   Save the product link and the comparison fields relevant to your range.
2. **Record the configuration**
   List the size or version, colour and items you want supplied together.
3. **Evaluate the sample**
   Check the selected configuration against your written checklist and retain photos of the result.

4. **Agree the bulk order**
   Record the approved version, quantity, packing and delivery terms in the final quotation.

Questions for your buying brief

How should I use these examples?

Build a wearable outdoor range around the intended user and the task, then separate size, construction and finish. Backpack litres describe a capacity label, not torso fit or a carrying-load approval. Garment size labels need measurements of the finished garment; footwear needs its own size conversion and fitting reference. Keep these different sizing systems on separate sheets. For a sample, use the actual clothing layers or equipment the customer is expected to carry. Record the version tested and the observations so a later colour or construction change is not treated as the same approved item.

What distinguishes this reference? — Packable 20 L Daypack | 230 g Water-Resistant Travel Backpack

The 20 L daypack is listed at 230 g, with expanded dimensions of 46.5 × 26.5 × 9.5 cm and packed dimensions of 20 × 18 × 6 cm. Its fold-to-pocket format is a practical distinction from the other backpacks. The published litre capacity should stay as stated; multiplying the exterior dimensions of a flexible bag is not a substitute capacity measurement.
