TL;DR

Use a video to locate a construction detail or product question, then open the matching written record where one is identified. The catalog examples below are separate reference products; a video does not establish that they share the same factory, specification or test result. Save the clip URL and relevant timestamp with your question.

Keep the comparison traceable

Keep one specification sheet for each shortlisted version. Put the product URL, size, colour and dated photographs at the top, then distinguish published facts from requested changes. If the brief combines a tent, a cooking item and clothing, give each its own line and quantity. Their dimensions, materials and accessories describe different things and should not be merged into a single specification. For example, a tent’s packed length is a storage measurement, a kettle’s external dimensions do not state its usable capacity, and backpack litres do not describe torso fit. When a field is absent, leave it marked for confirmation instead of borrowing a value from a visually similar item. Before comparing quotations, check that they refer to the same version and supply scope. Record any substitutions explicitly, including

the affected component, colour or packaging. This makes later sample review more useful: the reviewer can compare an identified item against a written requirement instead of trying to reconstruct a decision from a photo and a price.

Compare catalog references

Use the individual specifications to build your shortlist. Each photograph below belongs to the named reference; other products are shown for comparison and are not included with this item.

2-in-1 Hexagonal Camping Tent with Awning | 280 × 240 cm

The tent and awning have separate dimensions: the tent is listed at 280 × 240 × 160 cm and the awning at 310 × 290 × 180 cm. Keep these as two outlines in a display or campsite drawing. The tent frame is 8.5 mm fiberglass, while the awning poles are 17 mm steel. Do not merge the two structures into a single pole-material description.

Inflatable Glamping Tent | 6.3 & 12 m² Models

The 6.3 m² model name is published alongside 300 × 220 × 220 cm dimensions; retain both labels rather than calculating a replacement floor area. The 12 m² model is listed at 300 × 400 × 200 cm. The record also names 12 cm air columns, a manual pump, fourteen stakes and ten guylines. Keep the inflation instructions and component list tied to the chosen model.

Adjustable Anti-Shock Trekking Poles | Multiple Colors

This reference is an adjustable trekking pole with an anti-shock feature and multiple colour presentations. For an assortment decision, distinguish the adjustment mechanism, grip, strap and tip as separate components. The present record does not give a numeric adjustment range or a pole weight, so neither should become a size filter or a printed specification until measured for the selected version.

From product selection to a sample brief

1. **Choose the exact reference**
   Save the product link and the comparison fields relevant to your range.
2. **Record the configuration**
   List the size or version, colour and items you want supplied together.
3. **Evaluate the sample**
   Check the selected configuration against your written checklist and retain photos of the result.
4. **Agree the bulk order**
   Record the approved version, quantity, packing and delivery terms in the final quotation.
